

Clinical Scientist

Agomab is a young and dynamic biotech company developing medicine for patients with inflammatory and fibrotic diseases, including Crohn's disease. We are headquartered in Gent with offices in Antwerp and Barcelona; and laboratory facilities in Turin and Touro.

We are looking for an experienced **Clinical Scientist** to expand our Clinical Team, reporting to the Head of Clinical Operations. The role will provide scientific expertise and guidance for the design, conduct, monitoring and reporting of clinical trials, as well as clinical development plans for drug candidates across therapeutic areas.

Who are we?

We are a highly motivated team, valuing ownership, trust, humility and courage in everything we do. We focus on pioneering science and getting results within an environment of continuous self-improvement.

What will you do?

- Develop, design and optimize clinical study protocol synopses and full protocols
- Create clinical development plans and strategic program assessments
- Coordinate and drive key opinion leader interactions and advisory boards
- Interact with scientific counterparts at Third Party Vendors
- Provide clinical strategy input and writing support in health authority briefing packages, IND and NDA/BLA submissions or other global regulatory submissions as needed
- Contribute to writing/review of scientific site guidelines, laboratory manuals, biomarker plans and other relevant clinical study documents
- Provide scientific input in Third Party vendor selection for the assigned clinical program/study
- Provide training to CRAs, investigators, other study personnel, and act as central point of contact for study-related scientific questions
- Contribute to external communications/publications of clinical study results
- Provide competitive intelligence support to the organization
- Act as Clinical representative in Project Teams or participate in/present at R&D Committee meetings as appropriate

Who are you?

- You have a Master's, PharmD, PhD or MD degree in the scientific, medical or paramedical area
- You have 8+ years of experience at a pharmaceutical company or CRO. Experience in early development projects is considered a plus

- You have strong attention to detail and are an expert in navigating scientific literature, interpretation of clinical data and display of clinical data
- You have a general familiarity with clinical biostatistics, pharmacokinetics, pharmacodynamics and the regulatory clinical development landscape
- You have in-depth knowledge of ICH-GCP, clinical study designs and applicable regulatory guidelines
- You are an excellent team player with strong oral and written communications skills
- Your project management skills allow you to identify and adapt to shifting priorities and competing demands while having the ability to maintain composure in difficult circumstances.
- You speak and write English fluently. Additional languages are a plus
- You are a motivated and self-driven person, independently managing your time and projects

What we offer

- The opportunity to develop **pioneering science in a young biotech company**
- Challenging and innovative work environment as part of a driven team
- **Flexibility and responsibility** based in Antwerp with remote working options that can be tailored for you
- Competitive salary and benefits
- An agile and fast paced environment

Interested in having a high-impact contribution in a growing company? **Send your application to HR@agomab.com** to the attention of Paul van der Horst, Chief Business Officer and join the team! Please be aware, Agomab is not working with any recruitment agencies so please reach out directly.
